FOLLOW-UP NOTICE OF PUBLIC INFORMATION CENTRE (PIC)

PROSPECT POINT ROAD SOUTH STORM DRAINAGE PROJECT

Thank you for attending the Public Information Centre (PIC) held on August 2, 2016 for the Prospect Point Road South Storm Drainage project. Town staff welcomes your feedback.

Based on the feedback and further subsurface investigations, the design will be modified to eliminate any road lowering, minimize/eliminate impacts to driveways, minimize any tree removals and maintain the general character of the neighborhood.

Town staff will develop the revised plans and present the revised plans to the community. As such the anticipated start of construction will be delayed to allow for design modifications and for additional public input. Another PIC will be held once the revised plans have been developed.

If you have any further questions regarding the project, please contact Monirul Islam, P.Eng at 905-871-1600 (extension 2413) or mislam@forterie.ca.
