

Notice of Public Information Centre

Goderich Street Watermain and Storm Sewer Replacement

The Town of Fort Erie has initiated engineering design for the Goderich Street Watermain and Storm Sewer Replacement project. The Town is planning on replacing the existing watermain and storm sewer along with the existing roadway structure (new concrete curb and asphalt road) between Forsythe Street to Princess Street.

Public consultation on the proposed design and getting feedback is an important component of the project. As part of the public consultation for this project, a formal Public Information Centre (PIC) is being planned to provide interested parties with an opportunity to provide input. This is a pre-approved Schedule A+ Municipal Class Environmental Assessment (MCEA) project. Those attending the PIC will have an opportunity to meet with the Project Team and discuss issues related to the project. The PIC will take place on:

Thursday July 26th, 2018

6:00 to 8:00 pm

at the

Fort Erie Public Library – Centennial Branch, Meeting Room

136 Gilmore Road, Fort Erie, ON L2A 2M1

If you would like to learn more about the project and are unable to attend the PIC, please contact:

Jason D. Marr, P.Eng,

Manager, Engineering Division,
Infrastructure Services

Town of Fort Erie
